

2030 Vision

Gold Coast Airport is unashamedly focused on leisure. Our core business is the facilitating of passengers primarily on route to their holiday destination. Hence we are part of the holiday experience. We intend to create an airport with a subtropical ambience that has a vibrant yet relaxed atmosphere.

Gold Coast Airport aspires to be an industry leader by embracing a dynamic aviation environment. We will strive to achieve our goals through operational efficiencies whilst ensuring passengers are processed in safety and comfort.

As we move forward we will embrace sustainability, protect our unique biodiversity and create urban forms which utilise our subtropical climate. Our airport will be a transportation hub providing all modes of transport. We envisage a pedestrian friendly environment and the airport will be landscaped to capture this subtropical theme.

The success of this vision will have created a desirable business location for employment, recreation, education and tourism, delivering increased social and economic benefits to the region.

Paul Donovan
